Type of Online Service	Examples
Communication	email, instant messaging, message boards, online conferencing, blogs, micro-blogging e.g. Twitter, newsgroups, chat, e-communities, social networking
Real Time Information	train timetables , news services, traffic reports, weather
Commerce	shopping, banking, auctions
Government	online tax returns, e-voting, applications for services (e.g. university entry, business incorporations, land registration), revenue collection, health services like NHS Direct
Education	VLEs, online learning, school web sites, school league tables, online revision, simulations, online teaching
Business	video conferencing, collaborative working, business networks
Entertainment	multi-user games, radio players, sports, books
Download Services	software, upgrades, music, film
Web Storage	Google docs, Drop Box
Online mapping and route planning (not Sat Nav).	Google maps, AA Route planner , RAC route planner

- Record every source of information in your bibliography and make sure you use different types of information.
- a range of information types should be taken to mean at least four different sorts of information, eg extracts from websites, screenshots, journal articles, sound clips, quotes from discussion groups etc
- Write about each type of online service and illustrate it with your chosen examples. Remember your audience. Use your sources. Try to really give a feel for what the service has to offer.
- Describe the advantages and limitations of each example that you have used. Aim to give a clear and balanced picture of the scope and limitations of these services. Make sure you include the following:-
 - Target audience
 - Benefits and drawbacks
 - Possible enhancements
 - Fitness for purpose
 - Non-internet alternatives
- Make some concluding comments about the current scope and limitations of the Internet as a whole.

UN E Government development index

Sri Lanka improved its eGovernment rank in UN eGovernment Development Index from 115th place in 2012 to 74th place in 2014

- Yes, I agree that eGovernment in Sri Lanka has improved considerably
- No, this is an over estimation. eGovernment in Sri Lanka has not improved enough to achieve such a higher rank
- Whatever the UN Report says, improvement in eGovernment is yet to provide citizens basic needs though on line services
- I do not know enough about UN eGovernment survey to express my view

Resources for Trainers

These sections draw on the ITrainOnline partners' experience in training and materials development, offering a collection of resources for trainers which focus on Internet and ICTs training in NGOs and community organizations.

Effective Training

Resources to help you to become a more effective trainer and develop training strategies for your organization.

Multimedia Training Kit

The Multimedia Training Kit is a series of modular training materials for use in workshops developed by ITrainOnline partners and others. The materials share a common easy-to-use format, and are freely available for non-commercial use.

Topic-Specific Resources

Annotated links to resources on specific topics, from Internet basics to advanced technical skills. All resources listed include materials specifically for trainers, such as handouts, slide shows, and workshop outlines.

- [Scitable](#): Geared towards advanced high school and college science students, Nature Education launched Scitable to provide free online access to more than 180 overviews of key scientific and genetics concepts. The tool consists of a 220-article content library (often cited from members of the [Nature Publishing group](#), more than 200 virtual classrooms set up by teachers across the globe, and a mentor network of experts poised to answer student questions. Educators and students can upload their own content for exploration and discussion, while the content library provides a number of articles accepted as valid sources at the university level.

What Is Scitable?

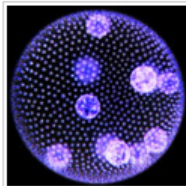

Educators: Inspire your undergraduate and high-school AP biology students with resources on genetics and cell biology from Nature Publishing Group, home of Nature, the most cited scientific journal in the world.

Using our platform, you can customize your own eBooks for your students. Create an online classroom. Contribute and share content and connect with networks of colleagues.

Budding scientists also can find advice about effective science communication and career paths.

- LearnHub: LearnHub is a network where members can create their own communities, share lessons, chat, create tests and tutor each other online at no cost. Schools create their own virtual classrooms where students complete assignments, play games and share photos and text. One of the great features of this site is that the site's report generator allows teachers to track users' progress. While the content is not as in-depth as Scitable's, this is a good site for standardized test preparation and basic K-12 education exercises. For more examples of test preparation sites, see our RWW list of resources.

Country:

- **Edmodo**: Edmodo is a private micro-blogging service for schools that allows teachers to edit privacy options within their virtual classrooms. Educators generate a join code and students log-in to chat, link to files, share notes and check their collective calendars for upcoming exams, quizzes and Pro-D days. While some of the other tools we've presented offer an open-access learning environment, this invite-only service offers students the chance to utilize web-based multimedia tools while allowing teachers to control an online discussion's security.

Teach More. Learn More.

Millions of teachers use Edmodo to engage students, connect with other teachers, and involve parents.

Create your free account

I'm a Teacher

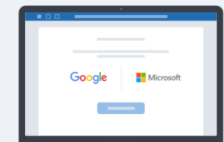

I'm a Student

I'm a Parent

Seamlessly use Google Apps for Education and Microsoft Office

Edmodo is tightly integrated with Google Apps for Education and Microsoft OneNote & Office. You no longer have to remember multiple passwords, or click out of Edmodo to access your Google Drive or to collaborate using Google Docs. Whether it is Microsoft or Google, we support them both.

Moms and dads like learning, too

The Edmodo parent mobile apps make sure whatever you teach during the day gets reinforced at night by getting entire families involved in learning. Share assignments and due dates, classroom announcements, events, set up reminders and more.

- **Moodle**: Moodle is a free open-source course management platform designed to help teachers create better online resources. **Microsoft Education Labs** recently **announced a new Live@edu plug-in** for Moodle. Now in addition to providing lesson plan, assignment and quiz-making tools for teachers, schools also gain access to Outlook Live for e-mail, Office Live Workspace for document sharing, Windows Messenger for chat and Windows Live SkyDrive for 25 GB of storage. This tool is slightly more advanced than some of the others in the industry, but it does offer a number of scalable solutions.

Contact

Moodle is the open source platform that lets you build the perfect education solution for your needs.

LEARN MORE

Moodle is the open source platform that lets you build the perfect education solution for your needs.

We've grown Moodle since 2001 as an open source platform for educators to develop and manage courses online.

Moodle is a modular system based on plugins, which are like lego blocks that you put together to build whatever you want. There are plugins for different kinds of content, and plugins for all kinds of collaborative activities, which is where Moodle really shines. As an example our Workshop plugin manages a full peer assessment process, so you can get hundreds of students accurately grading each other's assignments (that can save you a lot of time!). Add some tracking and reports and the ability to add more plugins from the community or even ones you write yourself, and you can build some pretty amazing education environments.

The Moodle project is run by Moodle HQ from Perth, Australia, but would not be what it is without a huge community of users. Our community work together and help each other on moodle.org (itself a Moodle site), where they've taken Moodle's founding principles of feedback and collaboration online and practise it in our [Moodle forums](#), our wiki-based [Moodle Documentation](#), our [Moodle Tracker](#) for bugs and new features, our course-sharing site [Moodle.net](#), and our [Moodle Translation](#) portal (which means you can use Moodle in over 100 languages).

- [YouTube Edu](#): YouTube Edu allows students and educators to access lectures from leading educators across the country. For example, [Yale](#) and [Brandeis University](#) professors upload their lessons for public enjoyment. One of the most popular Channels is [the National Programme on Technology Enhanced Learning](#) – a collaboration launched by the Indian Institutes of Technology and Science in Bangalore.

- [ESL Video](#):
- ESL Video allows language educators to create quizzes from virtually any video on the internet. From here they can embed their quizzes into their classroom sites or redirect students to the ESL Video domain. Teachers tailor their video quizzes to specific learning units or create simple vocabulary quizzes like the one I made below using YouTube videos. While this tool may not be as sophisticated as some of the above services, its merit comes from the fact that teachers can incorporate pop culture products into their lesson plans with very little effort. Judging by the fact that the below Miley Cyrus video has more than 92 million YouTube views, teachers may be able to harness this tool to ignite a love of learning.

FOR TEACHERS

How To Use This Website

ABOUT ESLVIDEO.COM

ESLvideo.com provides educational resources for English as a Second Language Students to improve their listening, speaking, grammar, and vocabulary skills. The quiz activities and lessons are created by teachers, and are free to use in class, lab, or at home. Teachers are welcome to build a library of favorites, assign quizzes, view student scores, and create new quizzes.

EDUCATIONAL BLOGS

A blog is a website, where it is possible to write views or ideas on ongoing basis. An edublog is a blog created for educational purposes. Edublogs archive and support student and teacher learning by facilitating reflection, questioning by self and others, collaboration and by providing contexts for engaging in higher-order thinking.

Uses of educational Blogs

- ✓ Students use blogs for reflective journaling – summarizing class discussion, reflecting on what they learned during a class activity or project, sharing ideas for applying what they have learned to their own practice and so on.
- ✓ Educational blogs help to encourage students to articulate their ideas and perspective make their thinking visible and be brave and bold about their contribution to the greater discourse.
- ✓ Educational blog engage students in reflection on the domain, requiring them to critically analyze ideas, perspectives, theories, research and designs.
- ✓ Educational blog encourage student to see themselves as participating and contributing members of a professional community of practice.
- ✓ Blogging promotes writing: That is blogging helps student express themselves and share their ideas and perspectives in an articulate way; that is, it helps them to write, organize their writing and develop a habit of writing.

E-Resources

The Library subscribes the most popular and reputed electronic databases to provide a better service to the staff and the students of the university. Some of the electronic databases are IP authenticated and limited to the computers connected to the university network and some databases can be accessed through a given username/password.

Several databases are available through Consortium of Sri Lankan Academic Libraries and other electronic resources are provided by the International Network for the Availability of Scientific Publications (INASP) under the Programme for the Enhancement of Research Information (PERii).

DATABASES

- **Developing Library Network (DELNET)- Through NLDSB**
- DELNET has been engaged with the compilation of various union catalogues of the resources available in member libraries. It has already created the union catalogue of books, union list of current periodicals, union catalogue of periodicals, CD ROM databases, database of Indian specialists, database of theses and dissertation, database on periodical, articles union list of video recordings and several other databases. Objectives of DELNET are to promote resource sharing among member libraries to undertake scientific research in the area of information and science and technology to create new systems in the field, to offer technical guidance to member libraries on collecting, storing, sharing and disseminating information, to coordinate efforts for suitable collection development and to reduce unnecessary duplication whenever possible. Searching facility of DELNET is available for readers in the National Library.

<http://www.lawlanka.com/lal/welcome?menuValue=homePage>

The screenshot shows the Law Lanka website homepage. The browser's address bar displays the URL: www.lawlanka.com/lal/welcome?menuValue=homePage. The website header includes the Law Lanka logo with the tagline "A-Z Guide to Laws Of Sri Lanka and Reported Cases", a navigation menu with items like Home, Acts & Ordinance, Legislative Enactments, Case Law, Advanced Search, and iNote, and a "Welcome Guest!" message with links for Login, My Account, Institutional Login, Contact Us, Help & Support, and Terms. A prominent banner for "THE CONSTITUTION Revised Edition 2015" is featured. A navigation bar at the top right highlights "ATTENTION INSTITUTIONAL USERS". The main content area includes a "A New Consolidated Legislative Enactments Amended till Act No. 23 of 2017" announcement with a "Count on Us to Stay Ahead of Time" slogan. Below this, there are sections for "Latest Acts" (listing Income Tax and Sugathadasa National Sports Complex Authority amendments), a "Search / Browse" section with a keyword search box and a "Go" button, and "Sri Lanka Law Reports" for 2014 - Volume 1, listing cases like Sarath Fernando vs. Attorney General and Arther vs. Ameen. A "Case Digest" button is also visible. On the right side, there are QR codes for "LEAP- LEGAL MOBILE APPS" for both the App Store and Android. The Windows taskbar at the bottom shows the time as 8:00 AM on 11/17/2017.

Law Lanka

Law lanka is an online database providing full text contents of latest acts, consolidated legislative enactments, amendment acts, new law reports (NLR), Sri Lanka law reports (SLR). It contains legal aspects of Sri Lanka as follows.

Acts & Ordinance (accessible through year order as well as alphabetical order in Sinhala, Tamil and English full text from 1956 to 2016)

Legislative enactments (Consolidated, 1956 revised version and 1980 revised version with both reading and narrative modes)
Case laws (Sri Lanka Law reports, New law reports, Case Indexes with both reading and narrative modes)

The searching facility of law lanka online database is available in the National Library.

- **Library & Information Science Abstracts (LISA) via NLDSB**
- Library and Information Science Abstract (LISA) is an international abstracting and indexing tool designed for library and information professionals. LISA currently contains abstracts of over 440 periodicals from more than 68 countries in more than 20 different languages. The areas covered by LISA are Library Management, Library Technology, Library Use and Users, Librarianship, Libraries and Archives, Online Information Retrieval, Publishing and Book Selling, Records Management, Knowledge Management, Telecommunications, Technical Services, World Wide Web, Internet Technology, Information Technology, Information Storage, Information Science, Information Management, Computer Science Applications, Information Centres, Artificial Intelligence, Medical Information, Book Reviews, CD - ROMs and etc. Every two weeks, with more than 500 records added per update. Available content types are scholarly Journals, conference papers and proceedings. The searching facility of LISA is available in the National Library.

Welcome to ITI Institutional Repository...

ITI is Sri Lanka's pioneer Scientific Research and Development Organization. It is committed to elevating the country's technological status by providing demand-driven, self-sustaining research and technical services to the industrial community.

We are now pleased to present a comprehensive Institutional Repository (ITI IR) of our technological assets in digital format. The ITI IR features digital archives of these, research reports, presentations, teaching materials, speeches, video recordings etc. Most items in our repository are freely accessible by all except for some special items with limited access due to copyright restrictions.

If you have information materials that you would like to share with your colleagues, please contact the ITI IR Team. We will be willing to incorporate them into ITI IR.

Thank you,
ITI IR Team

In simplest terms, a digital repository is where digital content, assets, are stored and can be searched and retrieved for later use.

A repository supports mechanisms to import, export, identify, store and retrieve digital assets.

Why use Digital Repository?

- It provides a single place for sharing the results, via open access

- It provides global awareness of scholarly output and research initiatives

- It provides long-term preservation of all types of digital materials

- It provides for easy and accurate retrieval using advanced tagging and searching features.
